Benefits of bilingual education: Did you know that recent research on bilingual and multi-lingual students has demonstrated that learning a second language at an early age does more than give our children the gift of being able to communicate in another language? It actually "supercharges" their brains, stimulating the neurons to form more and more connections, eventually leading to better academic performance and higher test scores.

Television policy: Television viewing will be limited to short programs in French once or twice a week for educational purposes. On exceptional occasions, the students will be treated to a full-length feature (in French).

Field Trips: Field trips are an important part of our monthly activities and center on the season and the monthly theme. 2-3 field trips are scheduled every month (pet store, botanic gardens, Castlewood Canyon....) We will send home a permission slip in advance, and will drive our vehicles using your child's car seat.
